

## Wildlife Habitat Enhancement is a Priority for NRCS in Colorado- Assistance is Available to Private Landowners

### *If you are interested in:*

- Controlling river bank or classic erosion and improving the health of your land where resource concerns exist
- Enhancing your options for managing livestock
- Improving the diversity of your property as well as seeing more birds and other wildlife
- Improving the health of your forest or riparian corridor

### *We offer financial and technical assistance including:*

- Conservation planning and project cost-share through the Environmental Quality Incentives Program (EQIP) and the Conservation Stewardship Program (CSP)
- Guidance on habitat improvement and restoration
- Survey, engineering and design work for habitat projects
